sobfolio.dev

Senior Frontend Engineer with 8+ years of experience building scalable React and Next.js applications. Led platform migrations reducing 20M weekly API calls and improving developer velocity. Focused on frontend architecture, performance, and cross-team platform initiatives..

Career Experience

Senior Frontend Engineer | [Catawiki](#), Amsterdam

March 2024 – Present

- Led migration to a shared layout package using React and TypeScript, reducing API calls by 15M+ weekly and enabling header/footer integration tests.
- Consolidated specifications API-driven form into a shared package, establishing a single source of truth and reducing cross-service duplication by 50%.
- Became Lead of Development Experience team within Frontend guild, leading a team of 4 engineers to improve development workflows.
- Extended impact beyond frontend by contributing to backend APIs and introducing AI-assisted workflows, unblocking delivery during capacity gaps and accelerating development velocity.

Frontend Engineer | [Catawiki](#), Amsterdam

July 2022 – March 2024

- Reduced onboarding time by 40% by refactoring core components into a modular architecture and streamlining documentation.
- Strengthened product quality by implementing end-to-end testing (Java Selenium), reducing QA backlog by 20% and cutting critical production bugs by 60%.
- Migrated frontend from Ruby templates to a standalone Next.js repository, reducing build times by 70% (20 → 6 minutes) and improving CI/CD efficiency.

Technologies: JavaScript, TypeScript, React, Next.js, Ruby on Rails, SQL, REST APIs, Playwright, Jest, i18n, SCSS, Git

Front-End Team Lead | [SnappMarket](#), Tehran

August 2021 – July 2022

- Ensured uninterrupted transactions by architecting a server-side cart system with a client-side fallback, increasing purchase completion rates by 20%.
- Boosted average basket value by 40% by launching a bundle discount feature, driving cross-selling.
- Reduced deployment time by 50% by introducing CI/CD automation, minimizing release-related issues.

Technologies: JavaScript, React, Redux, Jest, React Testing Library, HTML, CSS, SCSS, jQuery, Git, Node.js, Express.js, REST APIs

Senior Front-End Engineer | [Shab](#), Tehran

May 2020 – August 2021

- Lifted conversion rate by 15% by optimizing UI flows across the purchase funnel.

- Reduced post-deployment issues by over 30% by establishing structured code review practices and improving code quality.
- Mentored two frontend interns, enabling successful project delivery ahead of schedule.
- Boosted organic traffic by 35% by implementing React Server-Side Rendering (SSR), improving search visibility and page indexing.

Front-End Engineer | [Shab, Tehran](#)

August 2018 – May 2020

- Ensured 99.9% site availability by revamping website architecture for improved uptime and performance.
- Reduced admin task completion time by 40% by building and launching a React-based admin panel.
- Streamlined client account management by engineering a B2B dashboard with React, improving user retention.

Technologies: JavaScript, Flow.js, React, Redux, Styled Components, SCSS, jQuery, Node.js, Express.js, Reactstrap

Front-End Developer | [Jahan Gostar Pars, Tehran](#)

May 2018 – August 2018

- Led redesign of the B2B panel from jQuery to React and Ant Design, modernizing the UI and improving usability.
- Enhanced onboarding experience by building a custom hint component for user guidance.

Technologies: JavaScript, React, Redux, Jest, Ant design, HTML, CSS, SCSS, jQuery, Git

Projects

Aimee | (React Native, Expo, GraphQL)

March 2025 – Present

AI-powered travel inspiration app for discovering and planning personalized trips.

- Developed a cross-platform mobile app using React Native (Expo) in a Turborepo Mono-repo.
- Integrated Auth0 authentication and a GraphQL backend (NestJS) to support secure, scalable data flows.
- Designed a scalable UI architecture using Tamagui, improving consistency and reuse across screens.

Technologies: Typescript, React Native, Expo, TamagUI, GraphQL, NestJs, Apollo, Prisma, Git

Education

B. Engineering in Computer

University of Science and Culture, Tehran, Iran, 2016 - 2019

B. Engineering in Computer

University of Pretoria, Pretoria, South Africa, 2014 - 2016
